

A call to action:

Striving for racial justice in academic biology

Lessons from a hot spring: Authentic transformation in the higher education classroom

Bryan Dewsbury, PhD

University of Rhode Island

Moments of national reckoning are impactful only so much as our willingness to interpret and act on their lessons. In this discussion, we will revisit the moments of spring 2020 through the lens of racial justice and reimagine our responsibilities as educators shaping students for critical consciousness of their current and future world.

An initiative sponsored by the Society for the Advancement in Biology Education Research (SABER) focused on promoting awareness, understanding and commitment to change academic biology environments to be more inclusive and strive for racial justice in STEM education. We are excited that speakers will be compensated for their time and this event is co-sponsored by Arizona State University's HHMI Inclusive Excellence Project, SEISMIC Collaboration, and University of California Santa Barbara.

Discussion

Date: Monday, Sept. 21

Time: 9 - 10 a.m. (PT) //
10 a.m. (MT) // 11 a.m. (CT)
// noon (ET)

Location: Zoom

asu.zoom.us/j/99219860373

All talks will be posted

online afterwards at:
